LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., August 24, 1928.

SIR:

I transmit herewith Part I of the annual report on Birth, Stillbirth, and Infant Mortality Statistics for the calendar year 1926. This volume includes only rate tables and general tables; the text will be presented in Part II, which will also include the text for Mortality Statistics, 1926. This is the twelfth report of birth statistics prepared by the Bureau of the Census. It is based on data from transcripts of certificates of births, stillbirths, and deaths, received from the registration area for births, which included 35 States and the District of Columbia in continental United States, and also the Virgin Islands.

The total number of births returned from this part of continental United States containing an estimated population of 89,988,000, or 76.8 per cent of the total, was 1,856,068, corresponding to a birth rate of 20.6 per 1,000 population; the total number of stillbirths was 70,716, with a ratio of 3.8 to 100 live births, and the total number of deaths under 1 year of age was 136,118, corresponding to an infant mortality rate of 73.3.

Arizona and Idaho were added to the registration area in 1926.

This report was prepared under the direction of Dr. William H. Davis, chief statistician for vital statistics, assisted by John B. Mitchell, supervising special agent.

Acknowledgment is made of the efficient service rendered in the preparation of this report by Miss Elizabeth Staker.

Respectfully,

W. M. STEUART,
Director of the Census.

Hon. WILLIAM F. WHITING,
Secretary of Commerce.

TABLE I.—POPULATION, BIRTHS AND DEATHS, INFANT MORTALITY, AND STILLBIRTHS, BY COLOR: 1926

[Figures for white and colored are shown separately for minor areas only when the colored population formed at least 10 per cent of the total, or numbered 10,000 or more on Jan. 1, 1920. "Urban" includes "cities" which are municipalities of 10,000 inhabitants or more on Jan. 1, 1920; the remainder of the State is included in "rural." Small areas with high infant mortality rates, designated by a dagger (†) contain institutions for the care of children. Minor areas designated by an asterisk (*) contain State insane asylums, State hospitals, maternity hospitals, etc., where occur many deaths of nonresidents and many births to nonresident mothers]
